## ARE YOUR KIDNEYS WEAK?

Thousands of Men and Women Have Kidney Trouble and Never Suspect It.

Most people do not realize the alarming increase and seriousness of kidney disease. While kidney disorders are among the most common diseases that prevail, they are almost the last recognized by patients, who usually content themselves with doctoring the effects, while the original disease constantly undermines the system.

Weak kidneys may cause lumbago, rheumatism, catarrh of the bladder, pain or dull ache in the back, joints or muscles, at times have headaches or indigestion, as time passes you may have a yellow complexion, puffiness or dark circles under the eyes, sometimes feel as though you had heart trouble, may have plenty of ambition but no strength, get weak and lose flesh.

**SPECIAL NOTE.**—You may obtain a sample size bottle of Swamp-Root by enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y. They will send you a book of valuable information containing many of the thousands of grateful letters received from men and women who say they found Swamp-Root to be just the remedy needed in kidney, liver and bladder troubles. The value and success of Swamp-Root are so well known that our readers are advised to send for a sample size bottle. Address Dr. Kilmer & Co., Binghamton, N. Y. Be sure to say you read this offer in the El Paso Herald—Ad.

## To Fight Film

**DENTAL SCIENCE** has proved that the great tooth wrecker is a slimy film. You can feel it with your tongue. Most tooth troubles are caused by it. It clings to the teeth, enters the crevices, hardens and stays. And teeth will discolor and decay where that film stays, however much you brush them. That is why millions of tooth brush users fail to save their teeth.

That film is what discolours—not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. Scientists have for years sought ways to combat that film, but the methods proved inadequate. Then one man, after extensive research, applied activated peppodent—a digestant—to the film. And many clinical tests seem to clearly prove that he solved this great film problem.

We ask you to see for yourself. This peppodent method is employed in Peppodent, and we offer a 10-Day Tube. See what it does when you use it. See the results in ten days. It will show you a way to clean your teeth as you never have cleaned them before.

## See How They Glisten

Analysis shows that the film is albuminous. Peppodent digests albumin. The object in Peppodent is to dissolve the film, then to constantly combat it. But peppodent alone is inert. It must be activated, and the usual agent is an acid harmful to the teeth. So peppodent long seemed forbidden.

Now a harmless, activating method has been found. And that method, used in Peppodent, makes efficient peppodent possible.

Able authorities have proved Peppodent by convincing clinical tests. It has been adopted, and is now endorsed, by leading dentists everywhere. It does what nothing else has done, and everyone should use it. We urge you to prove it yourself. Ask us for a 10-Day Tube. Look at your teeth and see what it does. See how they glisten. Do this for your sake and your children's sake. Learn the way—the only way—to cleaner, safer teeth.
